

Sylviane Moss

Sylviane Moss has been volunteering for the LOHP for more than 10 years. She is a scientist who graduated in France (Master in biology of Populations and Organisms), having gained a sound knowledge in botany, zoology and environmental sciences, before obtaining a PhD in plant physiology. She has worked as a plant scientist for 10 years before moving to science management in the Wellcome Trust CRUK Gurdon institute in 2011. She has a good grasp of data handling and databases, and she has been populating the LOHP monitoring database for several years. She has always been interested in environmental and conservation projects and she used to help monitoring the peregrine falcon population at nesting time in France.
